

Dr Nevin's Psychic Testing Cards (ESP Set) by Dead Rebel Productions

Dead Rebel Productions presents this beautiful variation on the standard **ESP Cards**.

They come complete in a decorative calling card metal case which comes inside a replica vintage Elkington and Co presentation box with silk effect lining. Also included is a copy of Dr Nevins first ever journal entry dating from June 1887 detailing his findings connecting his electroshock therapy and psychic phenomena.

Reminiscent of the later **ESP cards** from J.B. Rhine these cards can be used in the same way. The cards are marked, and ten cards are included in total, giving you two sets of five.

This is a visually stunning new take on the classic **ESP cards** and will dress up any of your favorite routines with a new take
