

Horrorscope by MR. Darkness

Ask a participant to find and silently read their Zodiac traits from a card while identifying their two closest star sign adversaries, receiving a cautionary message that not all alignments are harmonious. The performer can then instantly reveal their Zodiac sign without the participant saying a word.

The **Horrorscope** method eliminates the need for guessing letters through progressive anagrams, participant reactions, questioning, or using cribs. It removes the requirement to write anything down or keep track of any binary calculations.

This ethereal creation contains essential information about the Zodiac to present you, as an astrological authority. It employs an everyday carry card that conveniently fits in your wallet. Simply present the card, have the participant silently read their **Horrorscope**, while you mysteriously reveal their Zodiac sign.
