Self Starter by Paul Carnazzo

With **Self Starter**, you'll give your spectators a chance to be the magician and perform some amazing magic, the best part is they won't know how they did it!

Self Starter is a single card that appears to be a "cheat sheet" for magicians who are learning new tricks. The card outlines three effects, which you guide your spectators through, allowing them to perform the effects for you!

In the first two effects, they'll find your selected card under impossible conditions.In the third effect, they'll make the aces come to the top after they're inserted somewhere into the center of the deck.

You can add this card to any deck and you'll be ready to go.

Difficulty: Intermediate (some sleight of hand is required, which is taught on the video instructions)
