

Three Shell Game (Brass) by Leo Smetsers

New in from our good friend Leo Smetsers from Holland comes his beautiful take on the 3 shell game. Leo has designed and crafted the most beautiful stainless-steel caps that enable you to perform this routine with ease and in style! The caps have a very nice weight to them, and each cap is hand polished to perfection to give them a mirror like finish.

Leo has also included the perfect pea sized ball to use with the caps. Purchasing this set will automatically give you access to the full-length instant streaming video where Leo himself teaches you his technique and routines. Leo is a master at the 3 shell game and we are sure you are going to love everything about this set and Leo's routines.

What's more, Leo has even included a custom engineered canister to hold your complete set when not in use and the lid has been precision engineered to act as an additional cover.

Leos 3 shell game is a labor of love to manufacture, and our first batch is limited to 100 units. We are not sure when and if we will be able to get more. So, get your hands on a set now!

Set Includes

- 3 x Precision engineered hand polished brass cups
- 2 x Perfect pea sized balls
- 1 x Precision engineered steel container (to hold all your props in and use during the routine)
