

OMG OPENER by ASTOR

The routine is so simple as powerful and surprising. The routine has multiple climaxes, one after the other during the performance. Each seems to be more impossible than the previous one. The routine starts with giving the deck a real riffle shuffle and several multiple cuts of the desk.

The **first climax** is a Triumph effect. However, the face up cards are shuffled with the face down cards, all the cards are face down when the deck is spread.

Then the spread is divided into four piles and as a **second climax** there is an Ace on top of each pile.

The **third climax** comes when the piles are turned face up and there is a King on the bottom of each pile.

Finally, as the **last climax** spreading the piles, the card are the same suit and in perfect order from Ace to King in each pile.
