*A riddle wrapped in a mystery inside an enigma... **The Infinity Deck.***

*On the surface, a simple collection of pictures but bubbling underneath is a powerful deck of cards that entwines secrets with mysterious principles. Craig Petty & Lloyd Barnes officially team up for their very first release together! Widely recognized as two of the most creative magicians alive today, they bring you a barn burner ground breaking new project that will rattle the very belief systems of your audience.*

- *Take half of the deck and have THE AUDIENCE shuffle them face up into face down. From one side, they create the name of a playing card, from*

*the other, a number. A regular deck of cards, that's been in full view is opened and dealt down by the audience... the exact card is at the exact number!*

- *A pile of cards is shuffled multiple times and laid face up by the audience. They appear to be ordinary pictures on the cards until you point out that the images are homonyms and all of the cards in order spell out a phrase... that is a printed prediction that's been written on the box from the very beginning!*

*One more thing...*

***All of the above tricks are built into ONE routine!***

*"The Infinity Deck is the most fun I've had with any new release in a long time. Yes, the effects are entertaining and fooling. Yes, the methods are devious and clever. That's a given - this is Petty & Barnes after all. What I REALLY like is that the deck offers so much freedom to create new, bespoke and personalized effects. Oh, and did I mention the wordplay? Love it!"*

**- MARK ELSDON**
