

Celebration Of Sides by Robert Neale - DVD

Celebration of Sides will expose you to many unusual facets of the unique Robert Neale.

Meet Neale the *Topologist*, the *Artist*, the *Philosopher* and the *Trickster*. Join Neale the *Teacher* as he leads you on a personal tour of his world...a nonsense world that will distort your perception and alter your view of reality. Imagine listening-in as a *Professor of the Impossible* is joined by one of his best students as they present A Graduate Course on the Impossible.

Robert Neale is joined by Michael Weber as they discuss miraculous plots with the simplest of props...impossible boxes, walls with invisible holes, and multidirectional arrows...objects easily found in any alternative dimension.

There are no cards, no coins...just fresh impossibilities that will confound, enlighten, and delight both you and your audiences. Most of these plots can be done with objects found around you in daily life while others use amazing props that are simple to create in minutes.

Included are: Arrow of Good Fortune, (K)not Magic, Whatsabox!, Inside The Beltway, Trapdoor, Borromean Rings, Brick Wall, and more.

"Bob Neale, one of the most creative thinkers on this planet, takes us into an Alice In Wonderland world where impossible things happen. Nothing like this video has ever been produced before. Bravo!"

- Barrie Richardson

"Bob Neale is a wonder. How Neale manages to think of such things is a mystery hard to fathom."

- Martin Gardner
