

Squidz by Sean Goodman

ESP matching effects have always been popular with audiences. Traditionally these have used two sets of 5 cards, but why not move away from tradition?

Squidz is a modern-day multi-layered ESP routine, that is DIFFERENT, FAST PACED and has been thoroughly worked by full-time professional magician Sean Goodman.

Squidz consists of 5 marked ESP cards based on the hugely popular Netflix series Squid Game, 5 matching etched tactile wooden discs, a reveal bag and holdout.

The unique marking system is clearly visible and devilishly hidden in plain sight.

There is also a cunning "influence" card which takes the audience along a different path than just a simple matching scenario. This card essentially gives you FIVE OUTS corresponding to which symbol the spectator chooses, giving the impression that you have influenced their choice from the very start.

With around 2 hours of video, **Squidz** offers a variety of different presentation ideas including using the fantastic TAP and Inject apps (with full permission from the respective app developers).

Squidz is simple to perform, instantly reset and suitable for all close-up environments with no angle restrictions.

Squidz - ESP has never been so much fun!
