

Mortalis by Area 52 - Pokerdeck

LIMITED EDITION: Only 2000 printed! Will NOT be reprinted.

Mortalis Playing Cards

is a deck of premium playing cards printed and manufactured in the USA by the United States Playing Card company. Fully marked, it hides its secrets in plain sight.

Only 2000 decks were printed, and will never be reprinted or restocked.

The optical marking system was designed in such a way that the closer you look, the less you see. It hides in direct sight to the untrained eye. Spectators, and even magicians, cannot identify it up close.

To the trained eye, it takes less than 2 seconds to identify and read a card just from the backs. It's designed in such a way that the whole system revolves around the working of a clock. If you can read a clock, you can read Mortalis's secrets. Perfect for close-up!

Printed by the USPCC on their premium stock, then double crushed to perfection along with an embossed air cushion finish. A traditional cut ensures perfect faro shuffles and table work. Saying that the cards handle like a dream is an accurate description.

The custom Court cards were built from the ground up, featuring borderless courts with popping, matching colors. The facial expressions on some cards have been tweaked to give a unique, personal feel. Every deck comes with a double backer, a duplicate card, and a full tutorial on how to read and use the marking system.

Designed by acclaimed artist, designer of the Mint Playing Cards, Christofer Lacoste in Canada, and realized and produced by Area52Magic and Pravar Jain.

Get one (or 12) today, before they sell out forever.
