

My Power Deck by Jordan Victoria (Red) - Markiertes Kartenspiel

For years, magicians all around the world has released their own marked deck. But this one has advantages other don't. Jordan Victoria's **My Power Deck** will be your new everyday carry deck and we tell you why:

1. The price

Most of the marked decks are very expensive. That's why magicians only use them for special occasion and do not use their marked decks for classic effects such as the ambitious card routine, sandwich effects, etc...

No more switch to change your marked deck for your regular deck. Your marked deck can now be used for signed cards, folded cards, torned cards. This deck is very affordable.

2. The direct reading.

You will not have to decipher a code or calculate anything. The reading is as simple as "I look, I know."

The size of the mark has also been designed to be large enough to be easily read but small enough to blend into the deck's design. The marking can easily be seen at 1.5 meters.

3. The location's marking

Nowadays, people are becoming aware that marked decks exist... That's why this deck is marked in a place that people can't see if they riffle through the deck. And its reading will be even simpler!

4. The asymmetry.

Probably the most important point of this deck. This asymmetry will allow effects that were previously too complicated to achieve.

Some decks are marked and have an asymmetry. But this one is different. The mark itself creates the asymmetry. So you only have to focus on the mark and

don't look at two places to know which card has been rotated and the value of the card.

- Printed by the USPCC
- Maiden back design
- Tutorial in English (1h 45m long).
- +35 routines / technics / tips / ideas / variations (including 16 routines).
- Standard Cut
- Available in red or blue
