

Ink-Redible X by Nicholas Dakin

INK-REDIBLE X By Nicholas Dakin

Several years ago, I purchased the manufacturing rights to a moving spot effect called INK-REDIBLE. This idea and gimmick from Nicholas Dakin has become one of my favorite items to perform. I still believe this is the best gimmick available for this type of effect.

- **No doors**
- **No dental dam**
- **No half holes**
- **No opening or closing anything underneath**
- **No flaps**

After hand making a few X gimmicks for customers, I decided to look into a way to mass produce this brilliant gimmick with X's. I know you will love this.

This brilliant gimmick allows you to perform an impossible piece of magic. A spectator selects any card and signs the face. 4 black X's are drawn, one in each corner on the back of the signed card. No covering of any kind the X'S visually jumps one at a time into the top left corner.

You have to see this to believe it. The signed card is now handed back to the spectator with ALL FOUR BLACK X'S IN ONE CORNER.

This is what real magic looks like.

Custom-built gimmick, Easy to do, Resets in 2 seconds. Comes with the step-by-step online video instructions.
