

Easy Palm: Magic Grip Serum

Dry hands? No problem!

Dry hands can be a real challenge for everyone. But, as a magician, it poses additional problems when your hands decide to go on a moisture strike. Dry skin has little to no friction and can make your fingers feel as slick as a newly waxed floor, making a range of moves and techniques difficult or downright impossible to perform, and suddenly, performing even well-rehearsed tricks can become a gamble. Not because you lack the skill but simply because of the lack of grip.

Easy Palm will eliminate the problem and allow you to perform your favorite magic without worries. Just add a quick dab, and voilÃ ! It increases the friction of your skin, and your grip goes from 0 to 100 within minutes, and you'll find yourself making moves like palming, side steal, or second deal as easy as a Cross-Cut Force! Ok, that might be slightly exaggerated; after all, every great trick requires its share of practice. But Easy Palm will ensure a level playing field where the only variable is your skill.

Easy Palm was developed to accommodate the specific needs of magicians with dry hands, and we think it does a fantastic job. But don't just take our word for it.

Praise from the Pros

"My hands are notoriously dry, and Easy Palm is the best solution I've discovered. It's an indispensable part of my close-up toolkit."

- John Guastaferrro

"Easy Palm is a fantastic solution for those who have dry hands; it improves your grip, and it moisturizes as well."

- Jon Allen

Still Not Convinced?

You might find it hard to believe, but it gets even better. Easy Palm is easily

absorbed by the skin and won't leave your hands all greasy, not even when you sweat!

And wait, there's more. For those who care (and we think you should!), rest easy knowing Easy Palm is made entirely from plant-based and lab-made ingredients of the highest available quality. Neither the product nor any of its ingredients has been tested on animals.

About the Product?

Easy Palm is developed and manufactured in Denmark. It is made entirely from plant-based and lab-made ingredients of the highest available quality.

Apart from the emulsifier, all ingredients are organic. I haven't been able to find an alternative with the right properties and quality. So, for now, I have to settle for 97.6 % organic, which still qualifies for calling it organic products.

All ingredients have excellent caring and moisturizing properties.

List of Ingredients

Ingredients: Glycerin, Rosa Damascena Hydrolat, Argania Spinoza, Cetearyl, Sodium Lauryl Sulfate, Sodium Cetearyl Sulfate, Lactobacillus Ferment, Lactobacillus, Cocos Nucifera Fruit Extract.
