

Pocket Watch by PITATA MAGIC

PITATA Watch Pocket Edition works exactly like our wrist edition.

The battery life is also having a significant increase as we remove the second hand on the pocket edition. About 12 months.

The PITATA Watch - Pocket Edition boasts five groundbreaking features that redefine what a magic watch can do. It functions the same as the regular PITATA Watch Wrist Edition.

- **Lightning-Fast:** With our innovative asynchronous hand travel, the The PITATA Watch - Pocket Edition sets the desired time in just 2 seconds, as the hour and minute hands travel independently to the target position via the shortest path.
- **Time Peeking:** Experience the magic of time manipulation with the PITATA Watch - Pocket Edition's unique peek feature. Simply pull out the crown and have an audience member adjust the time. When the crown is pushed back in, the time will be transmitted to the PITATA App. The customized crown and electronic chip open many more possibilities for magic.
- **Seamless Connection:** Stay effortlessly connected with the PITATA Watch - Pocket Edition. The always-on Bluetooth pairs almost instantly with your devices.
- **IoT Integration:** Seamlessly integrated into the PITATA IoT ecosystem, this watch intelligently syncs with other PITATA devices, such as the Smart Whiteboard and Smart Memopad, and can control and adjust the hands on the watch to the desired time.
- **Improved Battery Life:** After we removed the second hand, the battery life has significantly improved and lasts up to 12 months.
- **Dual-Mode Control:** Take control with the PITATA Watch - Pocket Edition's dual-control mode functionality. Whether using the remote control or the intuitive PITATA App, enjoy unprecedented convenience and intelligence at your fingertips.

Includes an exquisite Watch Stand to display your PITATA Watch - Pocket Edition.
