

## Classicho On-Off Box by TCC

In the world of magic, some props are crucial yet designed to be subtly present. The key is to minimize their appearance in the audience's view and memory. These are often referred to as auxiliary or utility accessories, with the switching box being one of the most representative. We are excited to introduce a wooden switch box with high collection value-the **ON-OFF Box** .

The **ON-OFF Box** is sized for close-up interactions and parlor performances. It is designed for single-handed use, appearing visually compact yet offering ample space. The box measures 70mm x 95mm, with an interior space of 9mm, making it suitable for playing cards, tissues, keys, coins, sugar grains, salt grains, tea leaves, flower petals, and other everyday items.

Crafted from high-quality Cambodian Rosewood, the **ON-OFF Box** boasts durability and rich collection value. The wood is finished to resemble black ebony, giving it a luxurious texture. It includes a magnetic locking feature, allowing the box to be displayed from various angles after use, making it perfect for performance, collection, and display.

### Specifications

- Authorized by Conan Liu
