

## Dieboxed by Rodger Lovins

Mind reading, predictions, thought transference, transpositions, and teleportation are just a few things that can be accomplished with this amazing little box!

Any chosen color die or number chosen by the spectator is immediately known to the performer. He can then tell them what their selected number was or transfer their thought to another spectator.

The performer can also predict, in advance, what number is going to be chosen by any spectator, and for the finale, the performer can cause the die to penetrate solid through solid and predict the number the die will land on! What... Yes, predict in advance the number the die will land on!
