

## **The Cube Through Head by David Penn and TCC**

### **Cube Thru Head**

is the perfect illusion for visually penetrating a Rubik's cube through a participant's head.

*"Cube Thru Head is not only impossible and fun, but also a PERFECT illusion for your audience!"*

- Henry Harrius

We're thrilled to introduce an effect straight from David Penn's working repertoire. Presenting **Cube Thru Head** an engaging visual illusion that guarantees a delightful performance experience.

Whether used as a standalone illusion or to enhance your existing Rubik Cube routine, **Cube Thru Head** offers versatility and excitement.

Begin by showing two empty tubes to your audience. Insert a Rubik's cube into one of the tubes, and the cube remains visible through the side holes. Position the tubes on either side of a participant's head, and with a countdown from your audience, tilt the tubes and make the cube visually penetrate the participant's head and fall into the net below.

David Penn shares his expert routine lasting over 8 minutes in the tutorial, creating a show-stopping centerpiece for your act.

Crafted from the finest North American Walnut, **Cube Thru Head** includes a complete set of tubes, Rubik's cube gimmicks, and stickers for customization, along with two velvet carrying bags.

Engineered by professionals and meticulously finished, **Cube Thru Head** ensures flawless performances every time. The cube size is also compatible with other popular Rubik's cube effects.

#### **Includes:**

- Two tubes.
- Rubik's cube, gimmick, and stickers (the Rubik's cube and the

- gimmick are initially unstickered, allowing customization).
- Two velvet carrying bags.
