

Medusa's Eye (Collector's Edition) Tarot Deck

As a Collector's Edition, this deck features a lid-and-base box design. It represents the element of air, symbolizing wisdom, logic, and higher consciousness. The central mirrored silver holographic design resembles the projection of a figure from **Medusa's Eye**. To avoid petrification, people gaze at Medusa through the reflection of a "gazing lens." It is a blend of romance and allure, exuding a fatal and irresistible charm.

At the center of the card back, a serpent coils around a sword, with the "Eye of Medusa" in the middle, surrounded by a captivating gemstone border. The once "hidden goddess of love" has transformed into the "evil Medusa," turning the sword of love into the powerful "petrifying eye" that punishes betrayal and deceit. The surrounding silver leaves and white flowers symbolize temptation and fatal allure, embodying a beauty that disregards everything, unattainable and mesmerizing.
