

Dream Table PRO by Gonçalo Gil produced by Gee Magic

Dream Table PRO - By Gonçalo Gil da Gee Magic

After the huge success of the "Dream Table", it is time go beyond what a table can do. Gonçalo Gil and Gee Magic are finally proud to release the Dream Table PRO. We thought that more invisible switches were needed and that's how we achieve this new and revolutionary method, that will allow you to switch 4 objects without touching them.

Dream Table PRO was not created to do any kind of "visual magic" like: Vanishes, appearances or cups and balls routines... This was made to make invisible switches! Once they are done, for the audience nothing happened, but all the "magic" is done. Nobody will suspect about the table. The user can have an extreme personalized experience because he will be able to control and set up the switching speed through the Dream Table App. You can switch any object in just 3 seconds.

Dream Table PRO has 2 modes:

- **"Sequential mode" - The magician loads the table with the objects to switch in the order of the show**
- **"Multiple out mode" - The magician can select which object goes up.**

This will be perfect to perform sign card/bill or object to impossible location. You put the spectator's object on the table and change it into the "same" object. For the audience nothing happened, however you can have access to the real spectator's object through the back part of the table and load it whatever you want. You will be one step ahead of your audience.

Dream Table PRO is more stable with a four-leg model, which allows the magician to perform other effects on the table and use it as a regular stage side table. A custom-made cloth is also included, where the cuts are undetectable from 2 meters of distance.

You will be able to add some extra materials into your Dream Table PRO,

such us:

- **"Wood Coasters"** - If you want to use this in a situation that you want the spectator to put himself the object, we recommend our coasters that will be impossible to detect anything suspicious.
- **"Four legs Vintage color"** - The four legs included with the Dream Table PRO are black, but if you think that the wood vintage color fits more into your style do not hesitate to have them.
- **"Back Shelf"** - You are not limited to use only 4 times in your show. You can get our special stand where you can keep adding objects during the show for more switches and use this as many times as you want.
- **"Hard flightcase"** - If you are planning to travel with the Dream Table PRO, we advise you to have one of this.

We know that Dream Table PRO has endless possibilities, however we decided to include different routines to inspire you to create your own. Dream Table Pro is very easy to set up and use.

Dream Table PRO material included:

- Dream Table PRO mechanism
- Battery (it will last at least 3 hours)
- Battery checker
- Battery charger
- Four black wood legs
- Black cloth
- Four platform plates
- Remote control

Please note: The charger for Dream Table Pro uses a European Type C plug and will require and adapter and/or converter for countries outside of the EU.
