

Break-away Fan - Rainbow

The performer opens and waves a rainbow fan. He then hands it to a spectator, but the more he tries to open it, the more he can't because the fan keeps on breaking in many pieces. Only in the magician's hands the fan opens and waves.

- Easy to do and suitable for any kind of audience.
- The fan has a nice quality and is 28cm (11") long. The rods of the fan are made of aluminum.

In the video the effect is shown, but the actual item you will receive is shown in the photo.
