

Twin Tube Production

The magician shows two empty tubes. He then magically produces many silks and three colored bottles from them. Finally he pours some liquid from one of the bottle into a glass, and toasts to the audience.

- The silks and the glass are not included.
- Simple to do with great impact on on any kind of audience.
- The metal tubes are cm 26.8 (10,55") and cm 28.5 (11,22") tall and have a diameter of cm 12 (4,72") and cm 10 (3,93"). The bottles are about cm 24 (9,45") tall.
