

The Last Rise by Andrew

With The Last Rise, you will be able to create a "rising card" effect of a thought of card without electronics, without manipulation, and above all without the risk of any FI breakage!

You take the cards out of the case and ask the spectator to simply THINK of one of them. After returning the deck to the case, the spectator names the card they thought of and concentrates. You begin to perform a some magical gestures, then, after just a few seconds, a card begins to rise very slowly. This is the spectator's thought card!

Even better, you can repeat this effect immediately with another card (for example, the one chosen by a second spectator)!

Several routines and presentations are of course offered to you with The Last Rise. In addition, an explanatory video in French and english shot by the team accompanies this exceptional product (access via the codes printed on the packaging).

Andrew, a meticulous creator, has crafted an unprecedented gimmick of very good quality.

A Bicycle deck that will follow you everywhere you will be so delighted with the reactions of your spectators to such an effect!

Strong points:

- Specially handcrafted Bicycle deck.
- Instant reset.
- Possibility to perform different cards each time.
- Available in red.
- Solid and high quality gimmick.
- No electronics.
- Everything is under control, the card goes up when YOU decide.
- As powerful and impactful in real life as on video.
