Tenyo - Ghost card

The magician pushes a stack of playing cards against his cheek, and the cards magically penetrate into his face!

When he removes the remaining cards, the portion of cards that entered his face is now gone! Once again, the genius creator Lubor Fiedler has invented a shockingly visual magic effect. Audiences will doubt their own eyes when they witness this for the first time - it's like nothing they've seen before. And even you will be surprised at the clever thinking behind this magic effect once you learn the secret.
