

Ribbon Thru Glass

Show a wooden frame and a transparent plastic sheet both having series of similar holes in them. The plastic sheet is then placed inside the frame, holes of both the frame and sheet coincides. A ribbon is threaded through all the holes one by one in the frame and the plastic sheet locking them together, thus making it impossible for the sheet to escape from the frame. Yet in the count of three you magically remove the transparent sheet off the ribbon and the frame and show the ribbon is still threaded in the frame!

- A beautiful item carefully crafted from Teak wood.
- The frame measures 18.5 (w) x 14.7 (h) x 3.1 (d) cm.
