

## Production Drum

The magician displays a simple, completely empty tube. Covering both ends with tissue paper makes it look like a small drum. He plays it by drumming it with his fingers and, after a moment, breaks a piece of tissue paper and takes silk or ribbons, banknotes, etc. from the drum!

- Simple and always pleases the public.
- The whole is made of plastic. The tube is 6 cm high and has a diameter of 10.8 cm. Production items and Gibus are not provided.
