

Prism Dusk Playing Cards

The Prism cards are a beautiful and colorful creation featuring UV gloss ink on the card faces. This is not a just shinier card stock; it is an extra layer of gloss printed on the cards to create a unique finish. This gloss is not the same as MPC use on their 'impressions' decks – it is true UV gloss that is neat, highly reflective and has a slight rainbow shine to it that really catches the eye.

The Prism: Dusk card back is designed to capture the darkening tones of a clear sunset with the dying sun in the center, fading to deep blue and ultimately inky black scattered with stars. This full-bleed back is absolutely stunning!

All the cards in the Prism decks are fully custom. In the Dusk deck, the suit markers (pips) on the front are set in a dark evening sky filled with rainbow stars.

The court cards also match the glossy themes and are custom to the Prism trilogy.

The Jokers are just as beautiful; radials of rainbow light refracting through a prism and converging to embody the essence of the deck!
