

## **OMG Opener by Astor**

The routine is so simple and as powerful as surprising. There are multiple climaxes during the performance one after the other. Each seems to be more impossible than the previous one.

The routine starts with giving the deck a real riffle shuffle and several multiple cuts.

The first climax is a Triumph effect. However the face up cards are shuffled with the face down cards, when the deck is spread all the cards are face down.

Then the spread is divided into four piles and as a second climax there is an Ace on the top of each pile.

The third climax comes when the piles are turned face up and there is a King at the bottom of each pile.

Finally as the last climax spreading the piles the cards are the same suit in perfect order from Ace to King in each pile.
