

Money Talks by Tora Magic

The mentalist shows 5 black envelopes, in each he puts a completely different banknote. He mixes the envelopes and places a sixth envelope with a prediction in it, on the table.

A spectator freely chooses one of the 5 envelopes and takes out the banknote from inside. Incredibly it will match the banknote in the prediction envelope!

- The spectator's choice is totally free! Included are the 6 black envelopes required and tutorial.
- Of course, the effect can also be performed with slips of paper, playing cards or other thin objects.
- Money Talks is an extremely powerful, simple and pocket-sized routine that you will always carry with you to perform it anywhere!
- Banknotes are not included, you can use your own
