

Space coin - 1/4 dollar

The magician puts 5 Dollar quarters inside a brass cylinder and places this on a small fabric bag. Instantly all 5 coins disappear from the cylinder, penetrate through the bag and end up inside it! Now the coins are put back in the brass cylinder and this is placed once again on the bag. This time the coins disappear from the cylinder only to end up in the magician's hand. The magician repeats everything one last time, and to the audience's disbelief, as a grand finale, the 5 coins penetrate right through a solid table!

- Very easy to do.
- Comes supplied with a polished brass cylinder and a bag made in Alcantara.

In the video, the effect is displayed, but the value of the actual coin you will receive is detailed in the description and shown in the photo.
