

Tenyo - Mystery Showcase

The magician assembles a small showcase, consisting of a stand and transparent cover, atop a miniature table. To prevent anything from entering or leaving, a rubber band is wrapped round the cover. Finally the magician slides a tube over the showcase to conceal everything from view. A moment later the magician slowly raises the tube, revealing that a coin has magically materialized within the previously empty space!

This magic trick is particularly baffling because the coin appears under test conditions within a transparent case—there is no visible place to hide. The gimmick that enables this unique trick is itself out of the ordinary. A surprising method to this stage illusion...that fits in the palm of your hand.

- The coin may be used for other effects!
- It also works with a Quarter dollar Coin and with a 2 Euro coin.
