

Mini Guillotine

Show a miniature version of the famous guillotine and have a spectator help you. Ask him to insert a finger into the slot of the guillotine and, after a moment of suspense, pull the chain. The blade will fall on sight, piercing the spectator's finger which... magically, will be untouched and uncut!

Fabulous!

- Made with extreme care in fine Teak wood. The quality is decidedly high!
- The guillotine is 39 cm high and the base measures 14.5 x 6.2 cm. The mechanism is totally safe!
