

Midas Pot

The Magician shows a jar, opens the lid and shows it empty. He pours some grains of maize into the jar and closes the lid. Then he starts to shake the jar and opens the lid: the jar is found to be filled with pop corns!

- Great accessory that allows you to exchange objects, right in front of the audience!
- Being "neutral" and not a showy magical object, it is perfect for any type of performance.
- Made of hard plastic, it is 21 cm (8,26") high and the opening has a diameter of about 8 cm (3,14").
