

Melting Ball Illusion

Performer displays a small wooden tube, a small wooden sword and a steel ball. The tube has a slit in the middle for the sword to pass through separating the tube in two. The sword is passed through the slit in the tube and the ball is dropped inside the tube from the top. and it can be clearly seen that the sword does not allow the ball to pass. With few magic gestures the performer makes the ball to penetrate through the solid sword and to drop down.

- Always very intriguing close-up effect.
 - Definitely elegant version, made with extreme care in teak wood.
- The tube measures 3.4 (1,33") x 13.5 (5,31") x 3.4 (1,33) cm. The sword is 12.4 (4,88") cm long.
