

Matching Color Changing Plumes

You show a single green plume duster and an empty tube. The duster is pushed inside the tube and when pulled out , it is seen to have changed to orange. It is again pushed inside the tube and when pulled out again it is seen to have changed to three different colours (red, white & yellow). It is pushed inside for the last time and when pulled out, the plume duster is seen to have changed back to green.

- Simple to perform, very enjoyable for the spectators.
- The plume duster is 47 cm long. The tube is made of metal.
