

Card Changing Tripod - Plastic

The magician asks a spectator to choose a card, look at it, and put it back in the deck. The deck is then shuffled by the spectator. Once the deck is given back to the magician, he finds one card, and announces that it is the chosen card. Unfortunately the spectator tells him that it is the wrong card. So the magician lays the card down on an elegant tripod, covering it for a few seconds with a lid. After snapping his fingers, the magician asks the spectator to take the lid off. Incredibly the card that was shown before has now changed into the spectators card.

- The prop, plastic, is 14 cm tall, and has a diameter of 12 cm.
- Great also to change a white card into a printed card, to change money, make sponge balls disappear.

Note: In the video the effect is shown, but the actual item you will receive is shown in the photo.
