

Lynx Smoke by Lynx Magic

Lynx Smoke: the most innovative and reliable method for producing beautiful clouds of smoke from the magician bare hands, sleeveless.

No more wires, cables, special cloth requirements or big battery packs.

Finally the magician can produce the smoke in one self-contained wristwatch, making the effect much stronger and clean.

If you don't wear a watch while performing magic, Lynx Smoke is the perfect reason to start using one.

NOTE: The watch is made by default for the left wrist.

- Lynx Magic quality.
- Just two drops of liquid (included) are enough for approximately 10 smoke productions.
- A full battery is enough for approximately 25 smoke productions. It also comes with a USB charger, and the battery take only 60 minutes to charge.
- The instructions are supplied through a practical download link. They are in English, but easily understandable by anybody thanks to the clear video.
- No one suspects that the watch is gimmicked, allowing the magician to roll his sleeves totally, giving the performer total freedom, creating a very magical moment.
- The watch does not function as a real watch. However, if your spectator notices that the time is not correct while you perform magic, you should consider another job!
