

## Light Box by Sebastien Calbry

Sebastien Calbry and Dylan Sausset have combined their limitless creativity to offer you a unique card revelation, which is sure to amaze your spectators!

Camouflaged in an ordinary Bicycle card case, Lightbox will allow you to reveal a chosen card with the light of any smartphone! Yes, you read that correctly, a beam of light will be your revelation!

A card is chosen and then lost in the deck. You then take your case which you show empty and you light it with the flashlight of a borrowed smartphone. At any time, the light will change to the chosen card!

That's not all, the chosen card has now disappeared from the game and found itself in the case.

Supplied with the specially rigged case, made by Sébastien Calbry, expert in gimmicks (accompanied by the Bicycle card game), you will receive 2 gimmicks allowing you to reveal 2 different cards. You can therefore redo the effect with a different card without any problem.

Strong points:

- Super visual.
- Easy to do.
- Interchangeable gimmicks to reveal multiple cards.
- Bicycle quality.
- Works with any smartphone (may require programming on yours in order to do it hands-free)
- You have 100% control over the onset of the apparition.
