

Impossible Die

The magician shows a die and a small plastic tube. They both have a hole which goes through them from side to side. A spectator puts the die inside the tube, lining up the holes; then he passes a metal bar through the holes of the tube, blocking the die inside. Now, with a magic gesture, the performer makes the die penetrate the bar and come out of the tube, dropping on the table.

- It can be immediately repeated.
- Totally automatic. No skill required.
- Pocket-size, take it anywhere you go.
- The tube is cm 7,5 x 2,5 x 2,5 (in. 3 x 1 x 1). The die is cm 2 x 2.
