

Hole Shake

Show a card back with 4 holes in four corners... no optical or other illusions, they are real.

Show one, two, three and four holes. In a blink the 4 holes suddenly jump to the center of the card and holes from the corner are vanished!

It's mind-blowing, yet true, NO BLACK ART or anything comparable. The card is still held between your two fingers! Your spectators will be able to see that the holes are very real!

At the end the 4 holes in middle of the card visually vanish and you can show both sides of the card.

- Easy to do and highly visual.
- Made with original Bicycle cards.
- Visual magic and great even for online shows!
- The supplied card may have a blue back.
