

Color changing wreaths

A white wreath is shown and inserted into a bag where in the middle there is a hole. Through the hole a yellow hanky is passed and, after a magical gesture, the wreath is pulled out from the bag and has turned into yellow colour. This is repeated with other two white wreaths that will turn into green and blue colour. To finish the three wreaths are inserted into the bag and, after a moment, will unify into a one three-coloured wreath.

- Classic effect made with wool wreaths. We supply all the equipments.
- The wreaths have a diameter of 26 cm, while the big wreath of 66 cm. The hankys measure cm 34 per side.
