

Fate Chip Limited Edition

Fate Chip Playing Cards are a special souvenir for any classic card collector. They are based on the principle of honoring classic cards and combine many classic elements and fashion into the design. Fate Chip also takes into account the needs of magic and visual effects in Cardistry, so the cards have a dazzling performance both in the static presentation and the dynamic process.

There are 51 standard cards that can be combined with other cards produced by USPCC forming a magical process.

The deck includes a JOKER, ACE, and two GAFF cards which can be combined into different magic effects.

They are printed by the U.S. Playing Card Company on Q1 quality stock and have a casino style design.

- The cards are poker size.
