

ESP Prediction - Bühnentrick

The mentalist shows 5 esp cards and makes a prediction by putting them on display in a certain order on one side of a plexiglass board. After showing other 5 matching esp cards he asks a spectator to choose the order that he would like him to put them on the other side of the board.

Well, believe it or not, when the board is turned around the magician's prediction will match with the spectator's choice perfectly!
