

Dove through glass small

The magician shows a pedestal on which there are two doors. He opens them and extracts a frame that encloses a Plexiglass panel. He taps on the Plexiglass to show that it is solid and puts it back on the pedestal. He closes the doors and a moment later a silk is magically pushed right through the solid Plexiglass (instead of a silk he could penetrate the Plexiglass with a wand, his fingers, or another object). Then, the magician opens the doors again to show the Plexiglass to be always intact and solid!

- The pedestal measures 21.8 (8,58") x 23 (9,05") x 5.5 (2,16"). Silk is not provided.
