

## Color Changing Plumes

The magician displays four dusters with white feathers, and shows an empty tube. He slides a duster into the tube, passes a red hanky over it and a moment later, magically, the duster will have red feathers! He repeats the same thing with two other dusters changing the feathers to yellow and then green. Finally, he puts the fourth and last duster into the tube, passes the three scarves over it together and ... the duster will now have feathers of the three different colors!

- Simple to perform and pleasant to see for the audience.
- Everything you need is supplied: 4 dusters, a 42.5 cm (16,7") long tube and three 23 cm (9") handkerchiefs.
