

Clear Penetration

The magician displays a frame with a clear plastic plate in it. A playing card is put over the transparent plate. The magician penetrates the card with a pencil which will also be seen passing through the plate! When the card is removed it will have a hole through it while the plate will magically be intact!

- Classic effect, always very nice!
- Everything can be checked both before and after the performance.
- A small plastic pencil is also provided, but the effect can also be presented with a real pencil.
