

Bicycle - World of Warcraft Wrath of the Lich King

World of Warcraft is the most played MMORPG video game in the world!

The game dynamics recall the traditional ones of online role-playing video games. The player moves in a virtual world by means of an avatar, interacting with characters and having to carry out various missions.

Gradually the character progresses in combat, acquires new items that he can use, develops further skills such as learning to create magic potions, forging weapons, etc.

In 2008, the second expansion of World of Warcraft was released, subtitled Wrath of The Lich King. This deck is a tribute to all of that!
