

PITATA Smart Printer Thermal Notepad by David Penn

Idea by David Penn. The genius of the Thermal Notepad lies in every detail. All aspects of the Thermal Notepad, from its appearance to the printed dotted lines and even the torn spiral holes left behind when pages are removed, subtly reinforce the illusion of ordinary paper. One big step forward for the Thermal Notepad and also all the printer devices.

PITATA Thermal Notepad is a "stroke of genius" that the PITATA team is extremely proud of. Thanks, David. More natural, more discreet. A perfect and clever fusion that truly makes it feel like real magic. The **PITATA Thermal Notepad** is the perfect choice for all printer devices.

Paper Size: 80mm x 110mm

Contents: Thermal Paper Spiral Notepad (50 sheets)
