

Black Tiger - Revival Edition

Like fashion, something is cool until everyone has it, and then it gets forgotten about.

Many years later, those that revive it are considered cool - because the way to stand out is to have something that breaks the pattern and subverts the standard. Black Tigers are that break in the pattern. A black deck of cards in a sea of white paper.

Barely contained inside a brand-new, nostalgic tuck is a fierce and formidable design. Familiar with its rider-back bones, but unique with its striking, monochromatic colors.

Its aesthetic is timeless, but its stock is that of the future. Crushed, thin and ultimately durable.

No deck has ever had an impact like this before. This is the deck that started it all.

The first run of these special edition Tiger decks completely sold out within 96 hours. Now, over 20 years later, Ellusionist is still a leader in the industry we single-handedly crafted.

This Revival Edition snatches the torch from its ancestors and will carry it for years to come.
