

Red Dwarf by Radek Hoffman

Imagine a mind-reading process under completely controlled conditions! This feels like an impossible miracle of mentalism. The spectator can freely draw anything they want and thoroughly examine both envelopes. The drawing is then placed by the spectator into the first envelope, followed by the second envelope, and everything is secured with a paper clip. The best part is that the spectator can even sign the envelope, confirming that it is the same envelope with their drawing.

This effect is perfect for both working performers and those who wish to fool fellow magicians. Despite thorough inspection by the spectator, you will still have the perfect peek! The entire routine presents itself as an authentic "Test Condition" mind-reading demonstration that defies explanation. The specially designed gimmick allows for multiple variations of this mental miracle, each with its own unique handling.

The gimmick is made from a special plastic material, ensuring its durability for a long time. The method is bulletproof and cannot fail, allowing you to focus on your performance and enjoy the applause. Whether it's in a close-up, parlor, or even larger show setting, **Red Dwarf** works flawlessly.

This project was inspired by the original Bob Cassidy's White Dwarf, which revolutionized modern mentalism. **Red Dwarf** takes the limits of what is possible to the next level. We believe that it represents the ultimate example of how powerful mentalism should look!

Enjoy the power of **Red Dwarf**!

WHAT'S INCLUDED:

- Specially design gimmicked envelope
- Almost 1 hour of instructional videos with various routines and ideas
- Extra props needed for performances
- Access to a secret Facebook group where you can share your ideas with others

Key features:

- Easy to perform
- Quick 10-second reset
- Multiple handling and routine options
- High-quality props
- Spectators can examine both envelopes
- They can even sign the envelope
