

Dynamic Sharpie by ULTRAMantic

Innovation at your fingertips!

Just imagine, anytime, anywhere, even from a distance, you could control a pen with your mind. It could roll back and forth freely on a hard, smooth surface, and stop at any position at will. How incredible is that? After hundreds of days and nights of effort, we have achieved a highly integrated design with no openings in such a narrow pen barrel space. We've finally made it happen! Just need to bring a Sharpie when you go out, no need for anything else!

Features:

- The wireless charging base lights up the surrounding breathing lights as soon as the marker is placed inside. The breathing lights will automatically turn off when it is fully charged.
- The newly designed ergonomic dual-button remote control (EnchantKey) is silent, compact (approximately 1.4*1.1inch, 3.5*3cm), and comfortable.
- Magnetic switch pen clip, featuring automatic power on/off, ready to use all day.
- The battery level sensing system allows you to perceive the battery level simply by holding the pen body whenever it is turned on.
- The design allows for writing, and the weight of the pen body is only about 3g different from a regular Sharpie (equivalent to the weight of a US Quarter coin), making it difficult for the audience to notice any difference even if you switch it out at the end of a performance.
- The pen tip is built-in with a magnet, and the magnetic tip can be used with a magnetic duplication device to achieve outstanding mental magic effects.
- The brand-new antenna module design ensures a stable signal range of 1-4 meters; straight-line distances are even further.
- Can be performed on a variety of material surfaces.

Warranty Policy

Each product has an individual after-sales number, and the Dynamic Pen has a 2-year free warranty from the date of purchase. After 2 years we will provide permanent labor-free repairs, you only need to pay for the necessary parts and shipping costs.
