

## Emergence by Tim Hill

A revolutionary piece of magic technology that allows you to easily perform CGI-quality magic in real life.

As the product manager at Vanishing Inc., Tim Hill is obsessed with finding groundbreaking ways to combine technology and magic. After eight years of laborious work, he's finally ready to share his greatest creation to date.

**"Emergence"** cracks the code on visible, exciting, and impossible coin magic unlike anything you've ever seen. This state-of-the-art device will have you smiling from ear to ear every time you use it.

After a coin vanishes from your hand, it magically teleports into a glass that's sitting on a table, or can even be placed on the opposite side of the stage. The audience both sees and hears the moment this coin visually lands in the glass that is nowhere near you. It is a miracle-level dream effect that is achieved without any difficult sleight of hand or gimmicked coins required. If you can push a button, you can use **"Emergence"**.

You won't find a better ending to a Coins Across or Coins to Glass routine, or really any coin magic set. Tim has closed his show with **"Emergence"** for years, and soon you will too.

### A Masterful Piece of Magic Tech

Both Tim and Vanishing Inc. are so confident in the creative, intelligent construction of **"Emergence"**, that they've decided to break one of the biggest rules in magic.
